ProSoft Technology

Where Automation Connects.™

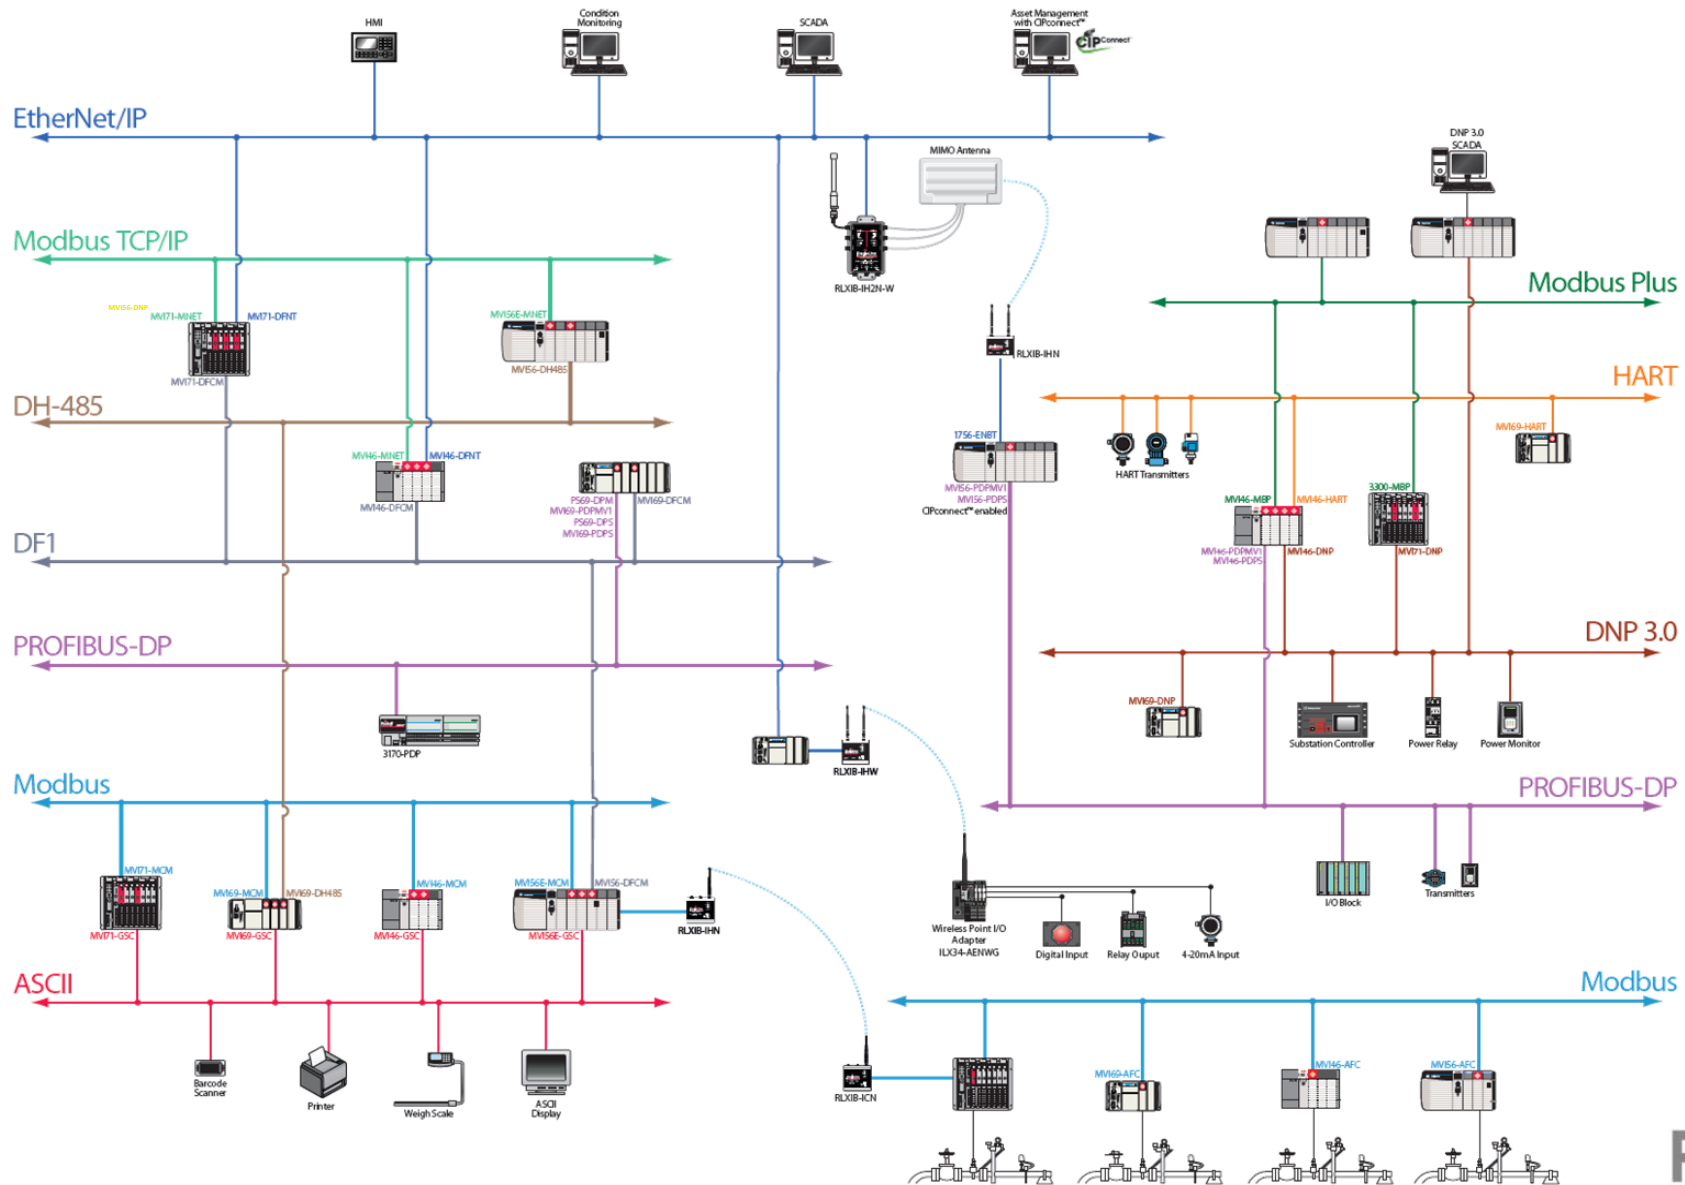

General information

Close to your customers

Technical support included - 3 years warranty - 400+ partners worldwide

Where Automation Connects.

Hardware Product Solutions

We are Industrial Automation “Translators”

- ❖ 185+ Plug-In Solutions for Rockwell Automation

- ❖ 160+ Industrial Gateway Solutions

- ❖ 40+ Industrial Wireless Solutions

“Where Automation Connects”

Rockwell Automation Solutions

ProSoft®
TECHNOLOGY
Where Automation Connects.

Integrated Interface Modules

AGA/API Gas & Liquid Flow Computer

Bristol Babcock

'C' Programmable

FA Control/Network

EtherNet/IP

Johnson Controls Metasys

LonWorks

PROFIBUS

Modbus

SM General

Siemens Industrial Ethernet

ASCII

DNP 3.0

BASIC

'C' Programmable over Ethernet

DNP over Ethernet

Generic Ethernet

IEC 60870-5-101

IEC 60870-5-104

MDA Scientific

Modbus TCP/IP

Siemens 3964R

BACnet

DH-485

Ethernet Global Data

Honeywell DE Master

Linitorque Master

Modbus Plus

Premier Integration Tools

❖ AOP – Add on Profile

❖ AOI – Add on Instruction

❖ Faceplates

- ◆ Free to customers
- ◆ Displays product diagnostics & configuration for operators and engineers to troubleshoot the process
- ◆ Works with AOIs – Add on Instructions to get display data

EtherNet/IP modules

❖ EtherNet/IP Client/Server Network Interface Module for SLC500, CompactLogix, PLC5, Micrologix 1500 allows:

- ◆ PLC processors to interface with EtherNet/IP protocol compatible devices and hosts
- ◆ remote Ethernet programming and troubleshooting
- ◆ SCADA access

❖ Perfect for:

- ◆ data with EtherNet/IP PLC's
- ◆ Adding additional communication channels
- ◆ Adding additional subnet access
- ◆ PLC based interface to DH+/ RIO, DH-485 devices
- ◆ VPN access
- ◆ Ethernet programming
- ◆ Building unified network using ethernet

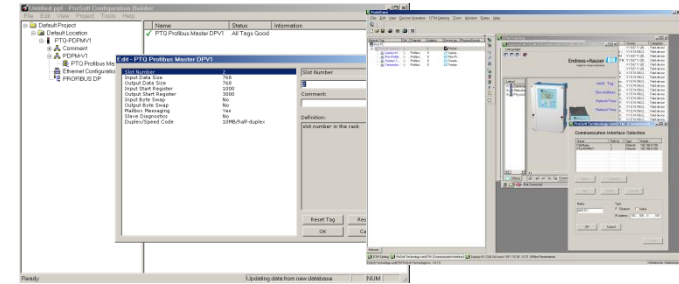

MVI46-DFNT - MVI69-DFNT
MVI71-DFNT

PROFIBUS in-chassis solution

FDT Communication

- ❖ FactoryTalk Asset Centre
- ❖ FieldCare
- ❖ PSFT comDTM

EtherNet/IP

PCB Communication

- ❖ Module & Network Configuration
- ❖ Diagnostics
- ❖ Network monitoring

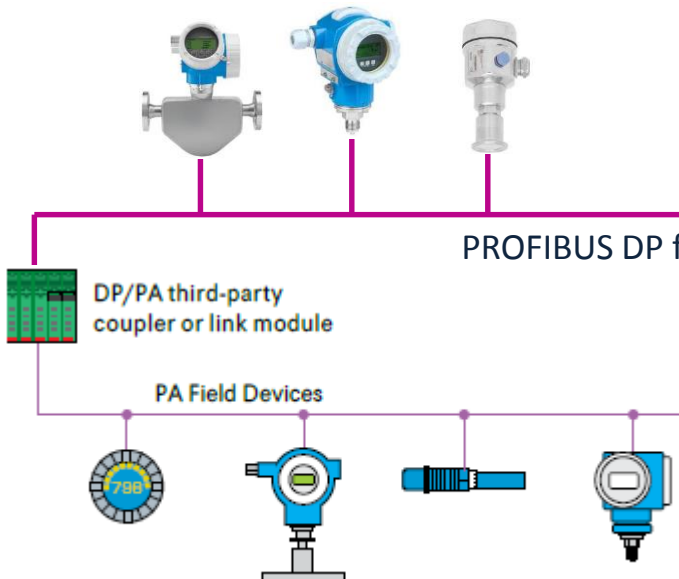

EtherNet/IP

PROFIBUS DP V1 Master module

PROFIBUS DP field devices

PROFIBUS DP Slave Module for CompactLogix, ControlLogix, SLC, Flex I/O, SCANport

ILX69 Profibus cards for CompactLogix

- ❖ Programmed by Ethernet
- ❖ Master supports 5700+ bytes IN/OUT
- ❖ Slave supports 244 bytes IN/OUT
- ❖ AOP used for seamless integration
- ❖ Training Video
- ❖ Easy setup

MVI69-PDPMV1
PS69-DPM

ILX69-PBM

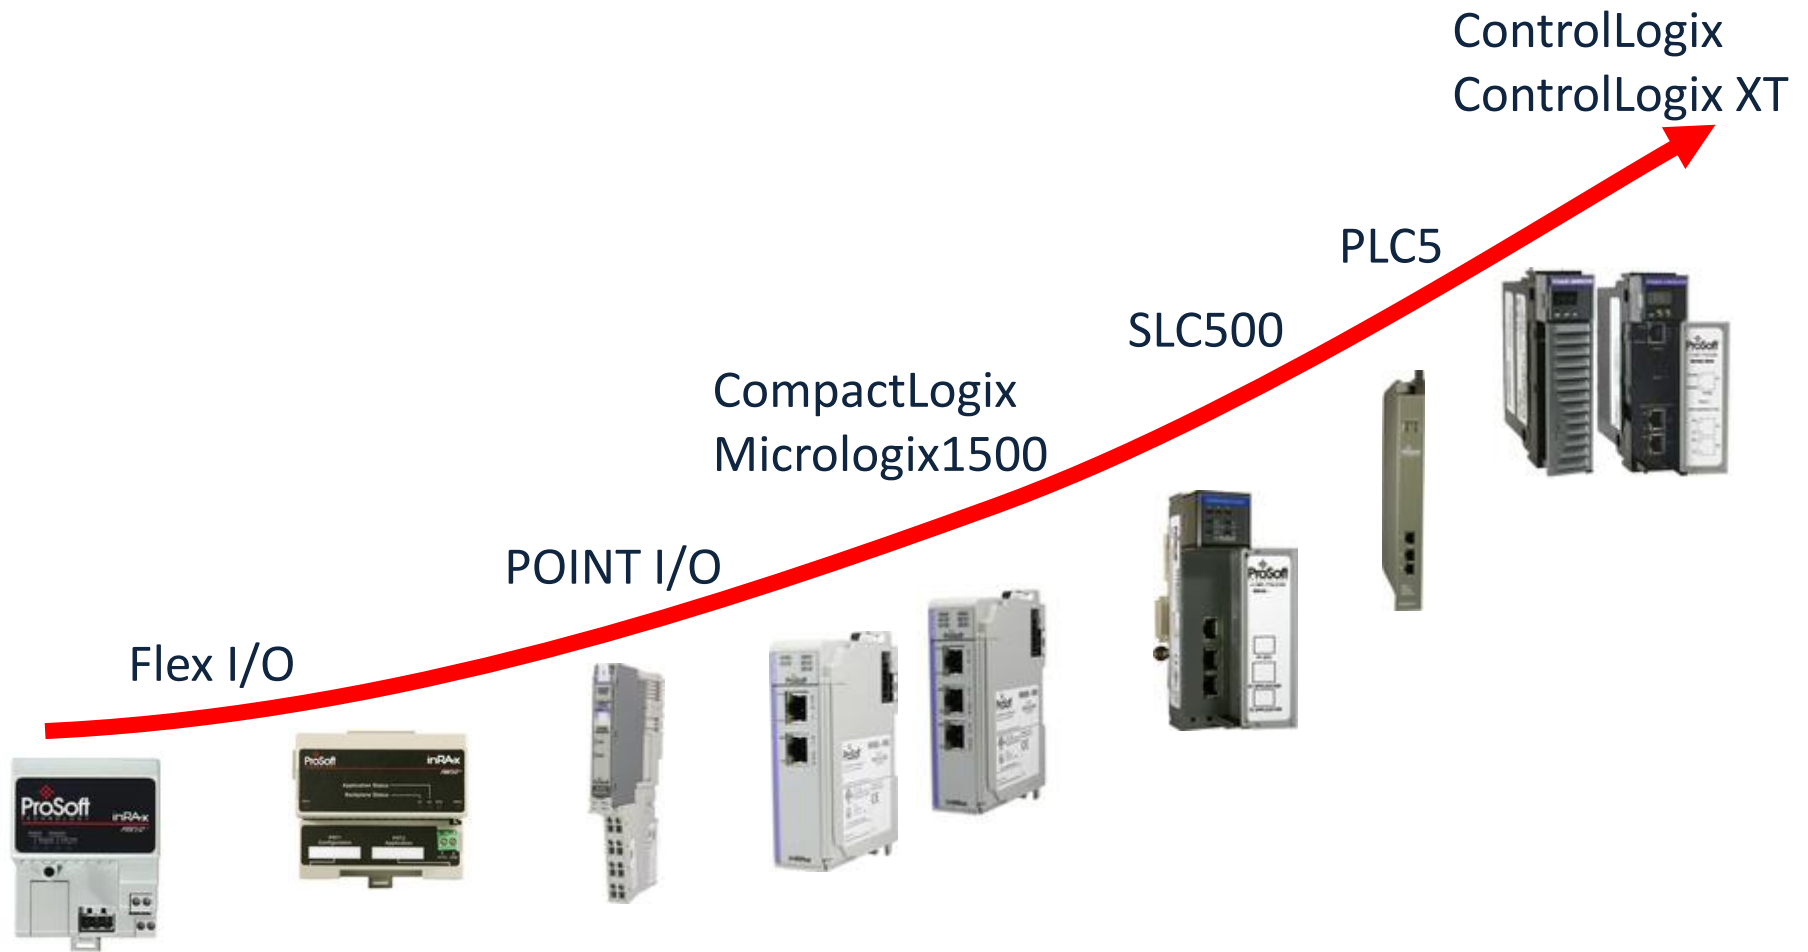

MVI69-PDPS
PS69-DPS

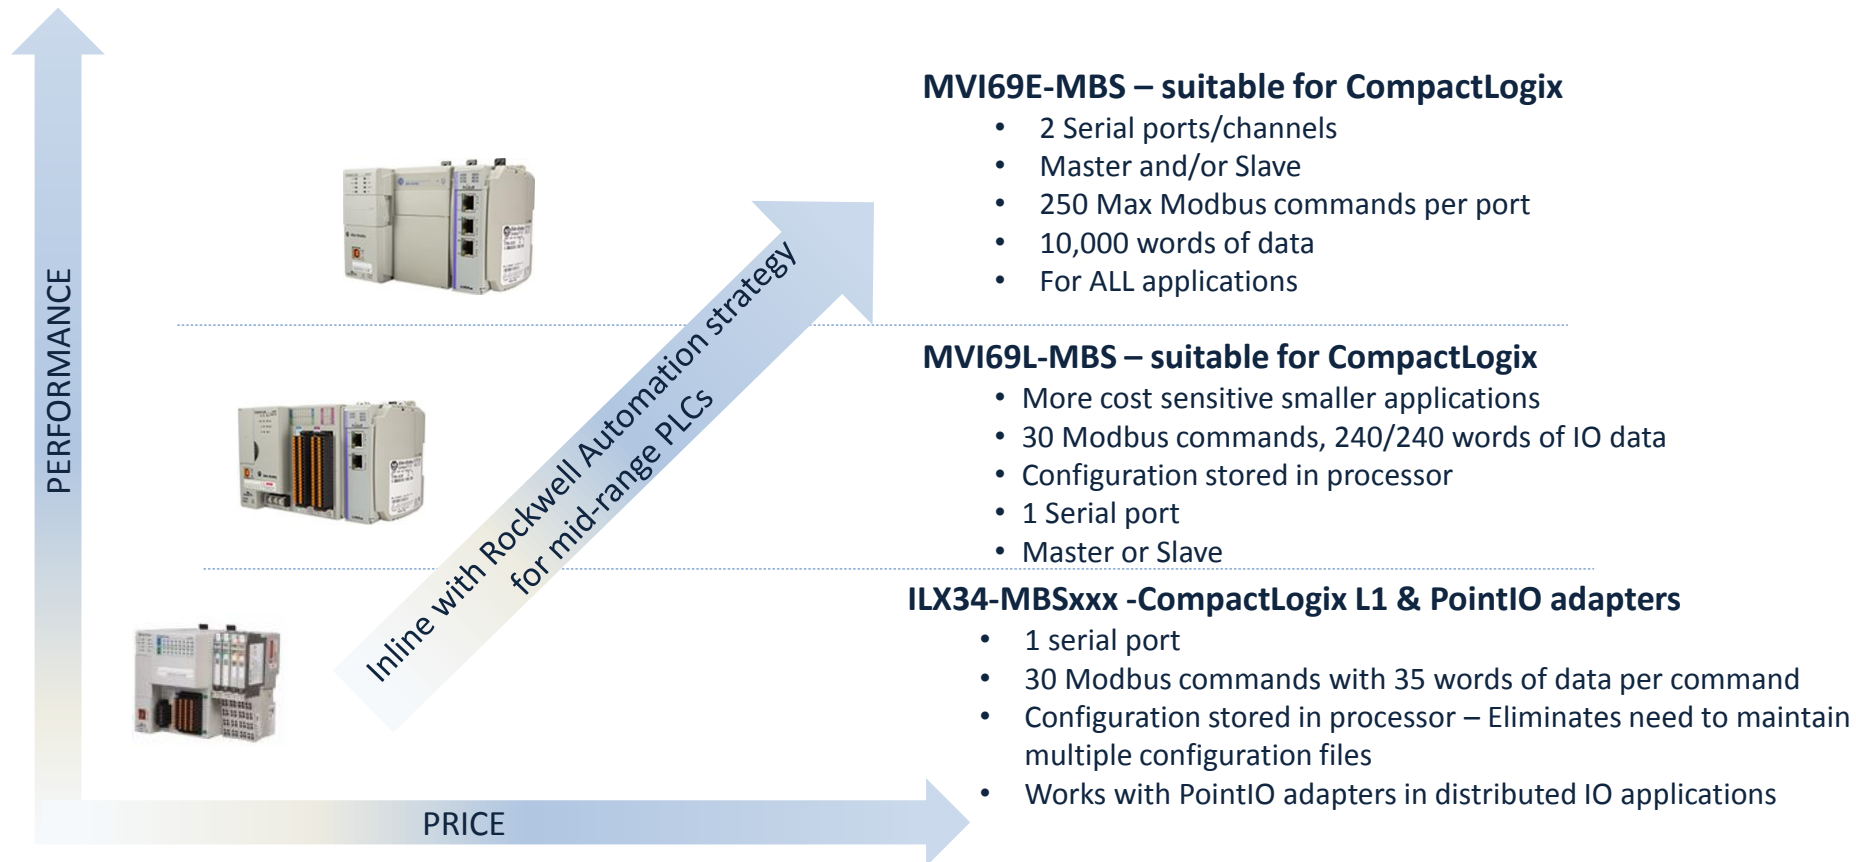

ILX69-PBS

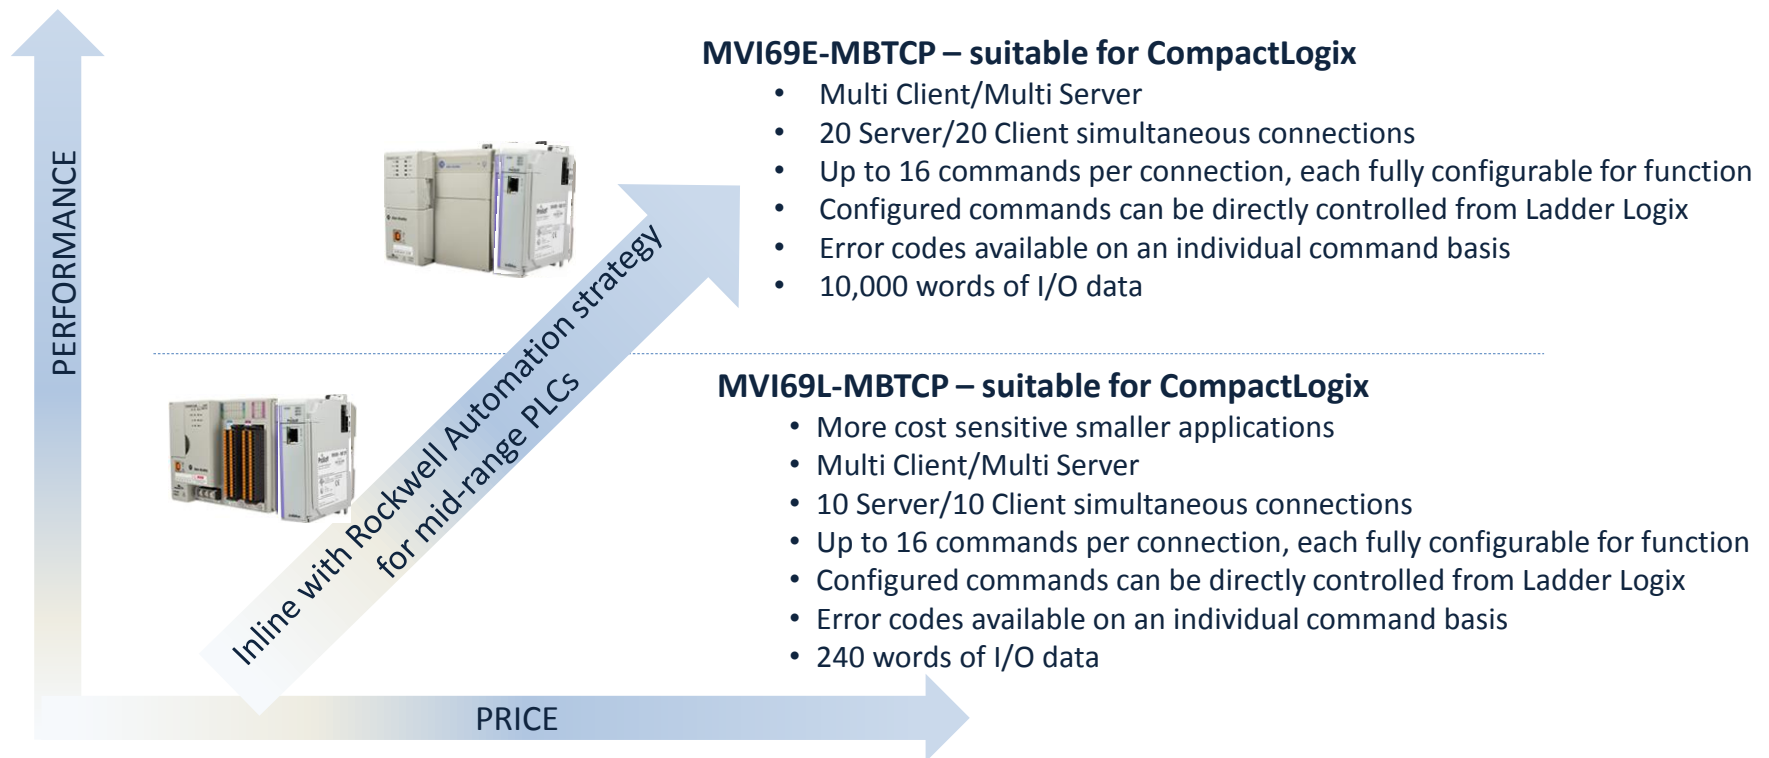

... and Modbus for all

Modbus Serial for CompactLogix

Modbus TCP/IP for CompactLogix

C/C++ Programmable module

MVI56E-LDM

C programmable modules based on Linux

Key Features:

- ◆ 2 Ethernet Ports
- ◆ Free VMWare image with preconfigured programming environment

C programmable modules based on Linux

Key Features:

- ◆ 2 Serial Ports
- ◆ 1 Ethernet Ports
- ◆ Free VMWare image with preconfigured programming environment

MVI69E-LDM

Gateways

Gateways – 60+ protocols

Smart protocol gateways

Features and Benefits:

- ❖ High performance gateway:
 - ◆ Supports multiple IO connections
 - ◆ Allows combination of PLC/PAC to communicate with various end devices
- ❖ Bi-directional data transfer
- ❖ Cost effective & easy to configure
- ❖ Built in SD card slot for config.files

Smart protocol gateways

Protocols Supported

ETHERNET/IP	MODBUS TCP/IP
EtherNet/IP to Modbus TCP/IP	Modbus TCP/IP to Modbus Serial
EtherNet/IP to Modbus Serial	Modbus TCP/IP to Modbus Serial 4 Port
EtherNet/IP to Modbus Serial 4 Port	ModbusTCP/IP to SIE (Siemens Industrial Protocol)
EtherNet/IP to ASCII	ModbusTCP/IP to Profinet
EtherNet/IP to ASCII 4 Port	Modbus Serial to Profinet
EtherNet/IP to SIE	Modbus Serial to Profinet 4 Port
EtherNet/IP to Profinet	

Profinet gateway

EtherNet/IP to Profinet Device

- ❖ Embedded EDS Add-On Profile
- ❖ No ladder programming is required when using I/O connections.
- ❖ Multiple I/O connections
- ❖ Communication via an I/O connection
- ❖ SD card slot (SD card optional)
- ❖ Video setup tutorial provided at psft.com/Ap5

Difference from PLX31

❖ Two Ethernet ports

- ❖ Each Ethernet port has to operate on a different network.

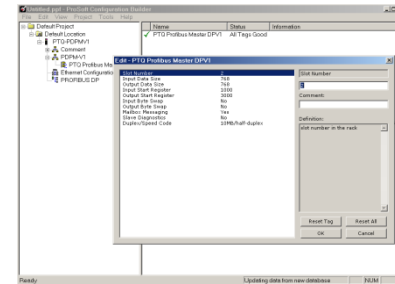

Our PROFIBUS solutions

FDT Communication

- ❖ FactoryTalk Asset Centre
- ❖ FieldCare
- ❖ PSFT comDTM

ETHERNET

In-chassis solutions
For Rockwell Automation

PROFIBUS DP V1 MASTER

Stand alone gateways

PROFIBUS

PROFIBUS DP V0
Slave to:

- HART
- ASCII
- DNP3
- IEC 60870-5-101
- IEC 60870-5-103
- IEC 60870-5-104
- MODBUS
- DH485
- DF-1
- and many more...

PROFIBUS DP V0 Slave to:

- BACnet
- LONworks
- XML
- METASYS
- Controlnet
- DeviceNet
- and many more...

PROFIBUS DP Slave Module
for CompactLogix,
ControlLogix, SLC, Flex I/O,
SCANport

DP/PA third-party
coupler or link module

Our Energy Solutions

- ❖ IEC 61850
- ❖ DNP 3.0
- ❖ DNP 3.0 over Ethernet
- ❖ IEC 60870-5-101
- ❖ IEC 60870-5-103
- ❖ IEC 60870-5-104
- ❖ Modbus TCP/IP

Application reference - Energy

Application description:

- ❖ ControlTech
- ❖ InForm Technologies (IFT), Slovakia
- ❖ EU mandate 20% of all energy from renewable sources until 2020
- ❖ Alternative energies:
Remote control and data transfer from renewable sources to dispatching distribution companies

Customer needs:

- ❖ Collect data from electricity meters and other devices using IEC60870-5-101 protocol
- ❖ Send back all the information to power distribution company

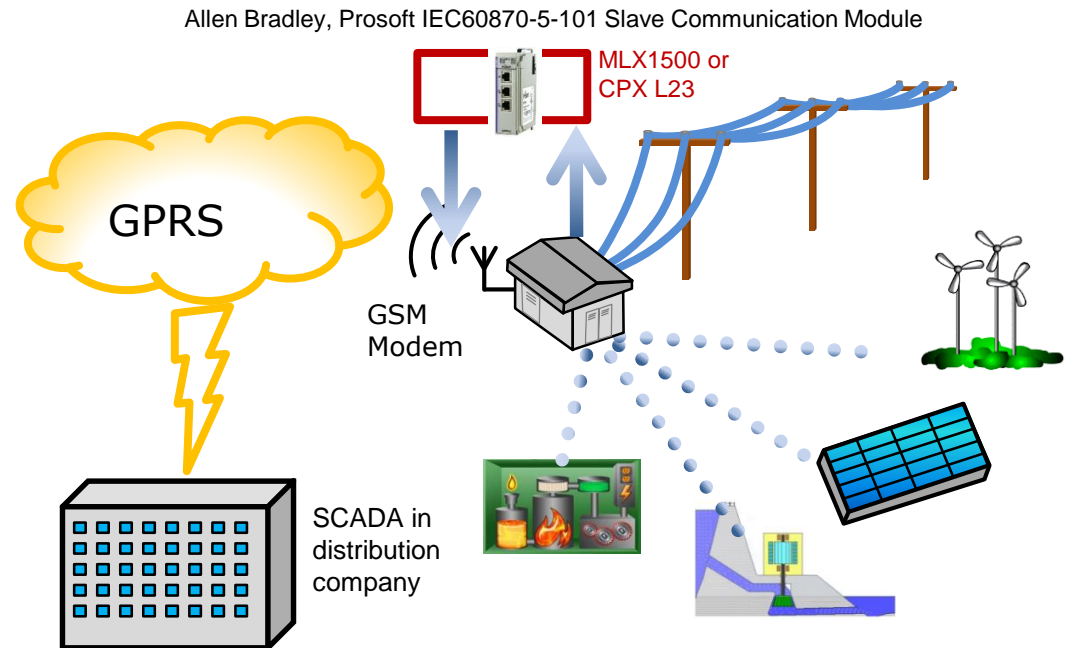

Application reference - Energy

Our solution:

- ❖ MVI69-101S (IEC 60870-5-101 Slave Communication Module)

Benefits:

- ❖ Fast Implementation
- ❖ IEC 60870-5-101 Protocol Compliant
- ❖ Easy extension for other networks
- ❖ Energy monitoring certificated
- ❖ Fully automatic & autonomous

Migration solutions

Why we migrate to new...

Warranty

Spare parts not available

Modern programming software

New media has to be connected

Spare parts expensive

New possibilities

New OS support

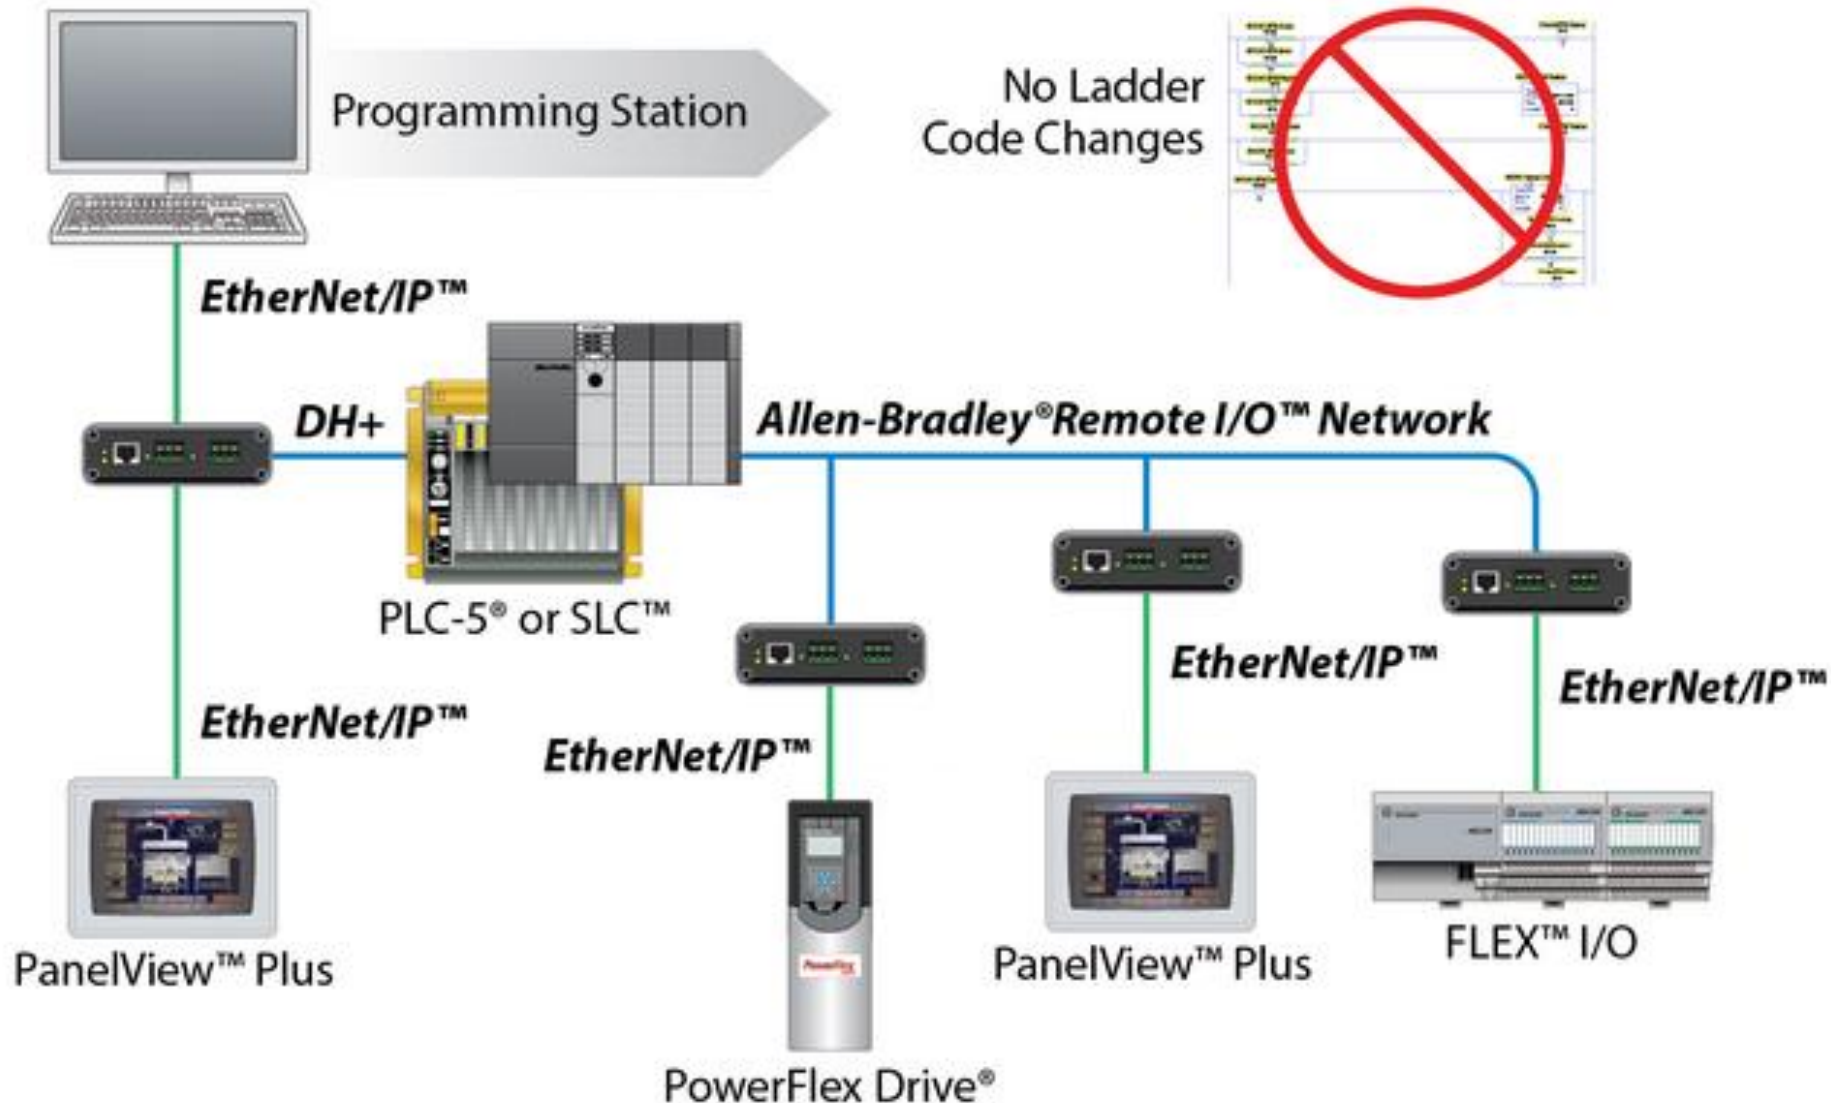

Lack of interfaces

Migration solutions

- ❖ Phase migration
- ❖ Life cycle extension

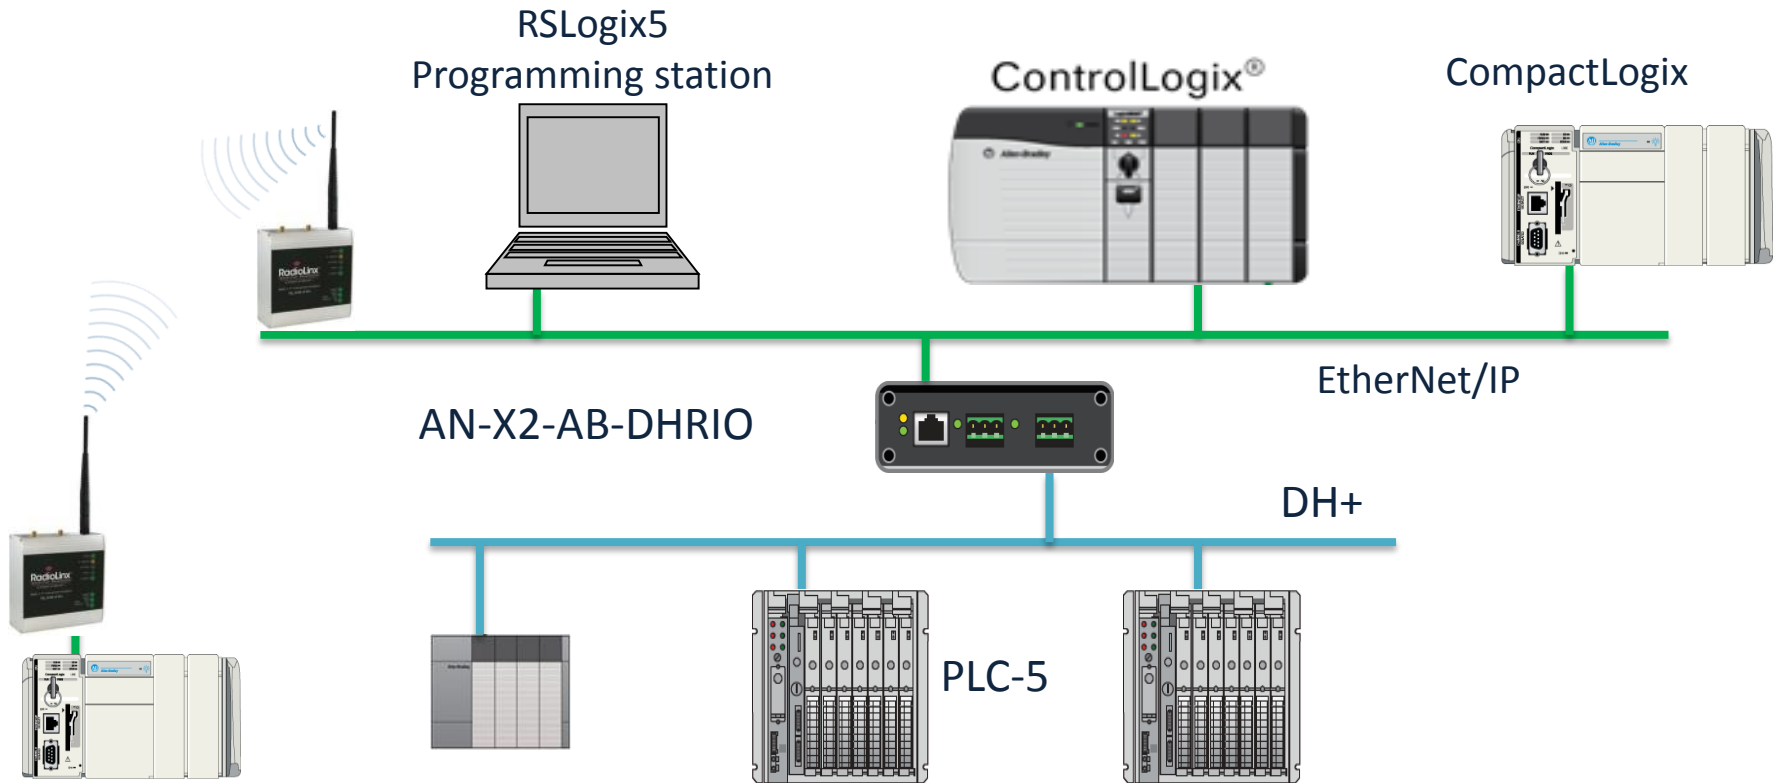

DH+ & RIO solutions

DH+ programming

- ❖ Connect a Data Highway Plus Network to EtherNet/IP PLC

HMI over DH+

- ❖ DH+ to Ethernet/IP HMI
- ❖ Upgrade your HMIs without replacing your Control System
 - ❖ Migrate to the latest PanelView Plus 6/7 products

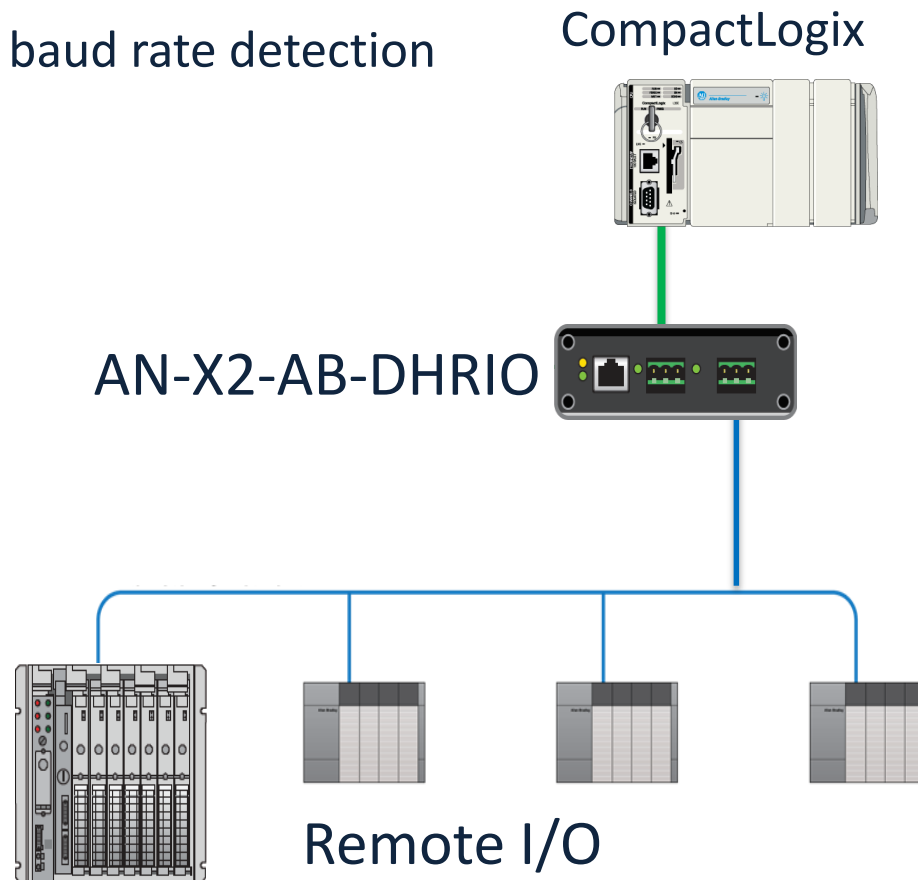

**PanelView Standard in Silver Series
End of year deadline

All AN-X2-AB-DHRIO will have chance to be upgraded
It works with PLC5 only

Keep RIO IO's

- ❖ Ghost mode
- ❖ Tag generation
- ❖ Automated baud rate detection

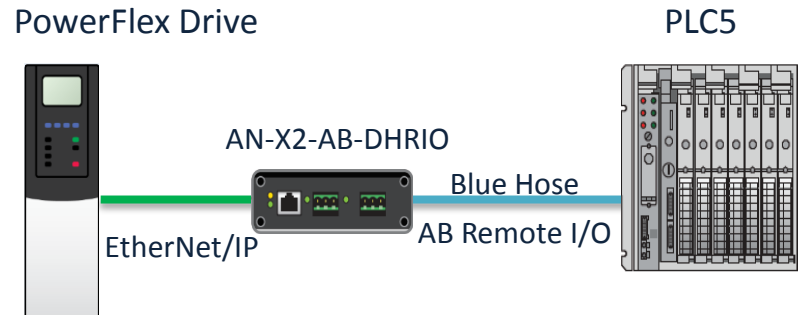

New PVP or PF over RIO

- ❖ Remote I/O Adapter to Ethernet/IP HMI
- ❖ Upgrade your HMIs without replacing your Control System
 - ❖ Migrate to the latest PanelView Plus 6 products

- ❖ A-B Remote I/O Adapter to EtherNet/IP Drives
- ❖ Connect up to 4 EtherNet/IP drives to an existing Remote I/O Network

RIO Flex I/O

- ❖ 1794-ASB (Remote I/O Flex adapter) has been discontinued by Rockwell. The replacement 1794-AENT/R is an EtherNet/IP adapter.

Specifications

❖ Flex I/O Migrations only

- ◆ Does not work with SLC I/O, 1771 I/O, Point I/O, etc.

❖ Supports the following Flex I/O modules

- ◆ AENT, OW8, IA8I, OA8I, OB8, OB16, OB16P, IB16, IE8, IE4XOE2, OE4, IR8, IRT8, OA8, OA16, OB8EP, OB16D, OB32P, OC16, OG16, OM8, OM16, OV16, OV16P, OV32, IA8, IA16, IC16, IB32, IV32, IB8, IB8S, IM8, IG16, IH16, IM16, IB16D, IV16, IB16XOB16P, IB10XOB6, IE12, OE12, IE8XOE4, IR8B, IT8

❖ Supports up to 16 EtherNet/IP Connections

- ◆ Each adapter and up to 8 (*)discreet I/O modules count as a single connection
 - *32 point discrete modules each counts as a single connection
- ◆ Each analog module counts as a single connection

Examples

- ❖ 1 analog input, 1 analog output, 2 digital inputs, 1 digital output

- ◆ 3 connections

- ❖ 3 digital inputs, 2 digital output

- ◆ 1 connections

- ❖ 2 Analog input, 1 Analog output

- ◆ 4 connections

Wireless solutions

Industrial wireless solutions

WHY USE WIRELESS?
Save money by saving time
Save money reducing plant wiring costs
Communication to moving/spinning equipment
Harsh environment communications
Remote access for mobile workers
Wireless as an alternative to Leased Telephone Line
Remote access for data recording, alarms follow-up, programming

Don't say **NO** to wireless just because you don't KNOW wireless...Talk to ProSoft Technology!

Introducing a NEW antenna

- ❖ RF transmitted through slots cut into the shield (under the insulation)
- ❖ Acts as a long, flexible antenna
- ❖ Provides uniform RF signaling along monorail tracks
- ❖ Solves line-of-sight challenges in corridors and tunnels
- ❖ Supports 802.11 2.4 GHz and 5 GHz wireless systems

Radiating Cable Applications

Radiating Cable Typical applications

- ❖ Communication inside a rail tunnel, road tunnel, subway

But today leaky cable is also used for other types of mobile applications :

- ◆ Distribution warehouse ◆ Cranes in aluminum plant ◆ Baggage handling system ◆ Funiculars ◆ Trolleys ◆ Monorail ◆ Conveyors ◆ Rotating machines ◆ Slip ring communication replacement ◆ Mobile application with I/O communication ◆ ...

Rackstacker

-  Patch Antenna Solution
-  Radiating Cable

Easier to implement

❖ Application description

- ◆ Material handling for warehouses and stocks.

❖ Application requirements

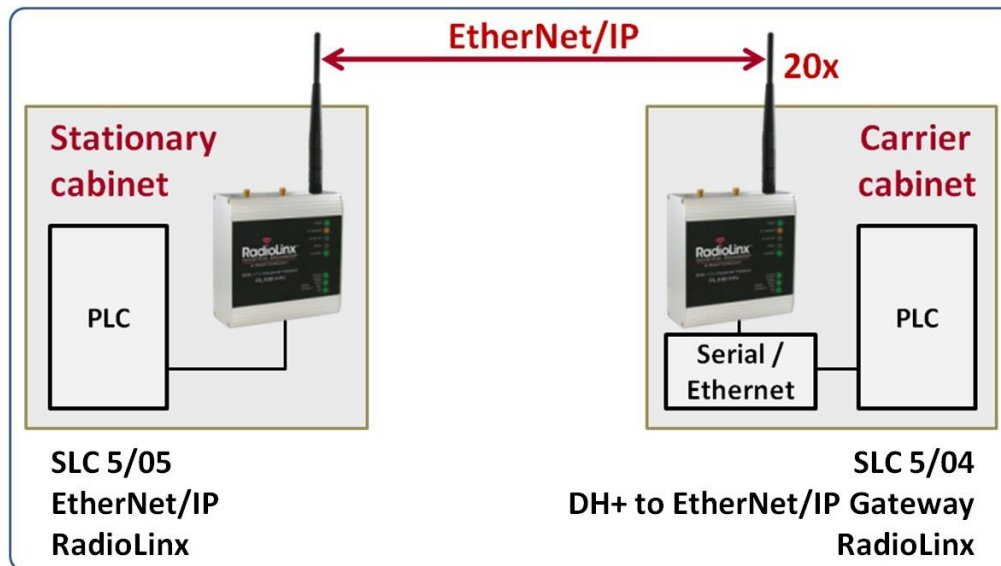

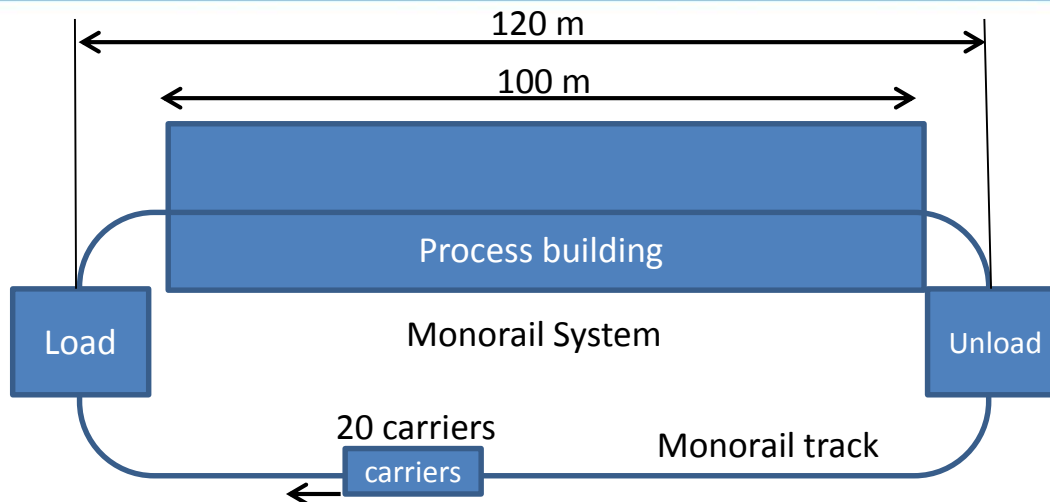

- ◆ A lot of metal frames
- ◆ Moving part
- ◆ Metal moving parts (cabinets) between rows of the warehouse)
- ◆ Reliability, availability (moving cabinet must not lose connection when at stop points).

❖ Location

- ◆ Dornach, Switzerland

Replace old DH+ network

Ford St Petersburg
Vsevolozhsk facility.

The **RadioLinX Automation**-class wireless solution from **ProSoft Technology**, allowed the number of carriers simultaneously in use over the loop in the paint-shop, to grow from 13 up to 20. Almost 54% increase!

Migrating **DH+** to **EtherNet/IP** and **slip-ring** to **RadioLinX** network

Rotating machines

- ❖ All types of rotating machines :
carousels, entertainment equipments,
typical applications with slip ring
communication replacement

Rotating
Bottling Line

Benefits :

Near field application : only few centimeters
between mobile antenna and the leaky cable.
→ clear line of sight guaranteed !

Zamperla - Italy

ProSoft Technology Solution

Our solution

- Radiating Cable
- RLX2-IHNF (Industrial radio)

Customer benefits

- Allow moving communication between Safety devices
- Data transfer improved
- Increasing reliability
- Secure and stable communication

RLX2 radio family

ProSoft®
TECHNOLOGY
Where Automation Connects.

802.11n Fast Industrial Hotspot

- ❖ High speed 802.11n technology
 - ◆ Channel Bonding & MIMO Antenna (2 streams)
 - ◆ Up to 300 Mbps RF data rate
 - ◆ 2.4 GHz or 5 GHz band – including DFS channels
- ❖ Optimized for Ethernet IO & Producer/Consumer systems

Multiple Data Streams (MIMO)

Multiple Channels (Bonding)

RLX2 Family Features

- ❖ Fast roaming with full bridging
- ❖ Diagnostic by free OPC server, EtherNet/IP or Modbus TCP/IP
- ❖ IGMP snooping/packet filtering
- ❖ Serial communication transparent or with Modbus and DNP ethernet encapsulation
- ❖ SD recovery card

ProSoft FAST ROAM Technology

❖ Fast 10ms Roam between Access Points

Radiating Cable System

- ❖ 802.11abgn Fast Industrial Hotspot Performance
 - ◆ 2 RC segments per radio (up to 125m per segment)
 - ◆ Fast Roam support
 - ◆ Less than 10 ms transfer time between masters
 - ◆ Up to 150 Mbps

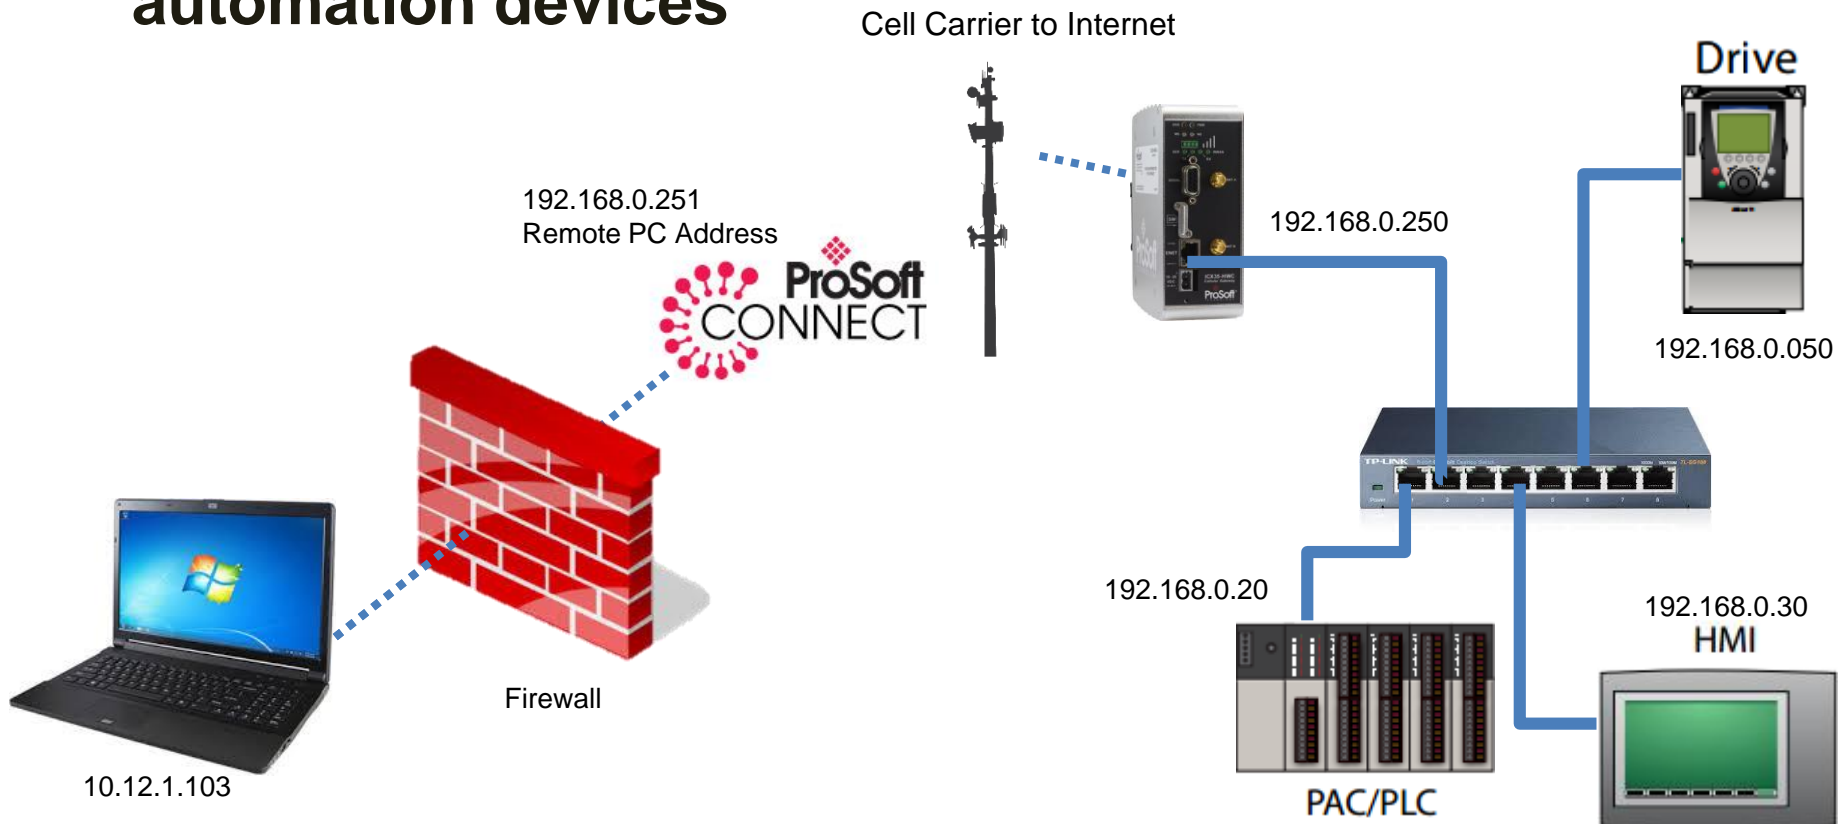

ProSoft Connect future of Remote Access

ProSoft®
TECHNOLOGY
Where Automation Connects.

EasyBridge™ - Advanced Networking

❖ **EasyBridge™ is the easiest way to connect to remote automation devices**

ProSoft Connect–Secure Remote Access

- ❖ Access Industrial Control Systems from Anywhere
- ❖ State-of-the-Art Cloud Native Technology
 - ◆ Best User Experience
 - ◆ Higher Level of Security
- ❖ Layer 2 VPN Connection
 - ◆ Better than routed services used by competition
 - ◆ Use Discovery Tools like RSWho, ProSoft Discovery Service, etc.
 - ◆ Same as being connected to local switch = works with AB, SE, Siemens...
- ❖ No User-Installed Software
 - ◆ Eliminates major security flaw of other services
 - ◆ Web interface works from any computer
- ❖ No static, public IP addresses needed
- ❖ GSM router configuration stored at the cloud

ProSoft Connect Account Overview

❖ ProSoft Connect Standard Subscription

- ◆ **Free** Secure Remote Access and Device Mgmt.
- ◆ 1GB VPN data use per month, per account
- ◆ Basic user access controls

❖ Create multiple users per account

- ◆ Standard Subscription – up to 12 users per account
- ◆ Unlimited number of ICX35 devices per account
- ◆ One VPN connection at a time

ProSoft Connect – Live Now

Want to test?

- ❖ Go to www.prosoft.io and sign up for free account
- ❖ On first log-in, take the “guided tour”
- ❖ Use the Support function to request a virtual ICX35 gateway
 - ◆ Step through device activation process
 - ◆ Try out device management features
 - ◆ Configure and connect VPN
- ❖ ICX35-HWC cellular gateways with firmware version 1.1 can now connect!

ICX35 without Connect

❖ Diagnostic and SMS feature

Name
AOI_ICX35

PLC 192.168.1.1

Technical Support

Wireless is easy ...

❖ The solution is **not only** radio module

The solution is not only solved by choosing the radio module.

Cables,
Antennas,
Splitters,
Lightning Protection,
etc.,
build the whole solution.

Wrong choices can generate a lot of problems.

Where to start?

❖ Collect the information on the application:

- ◆ Simple word doc – Customer to complete
- ◆ Get a plant layout
- ◆ Google Earth
- ◆ Drawings/sketches

ProSoft® Wireless Project Form
Where Automation Connects

Data Collection Form
In this page, there are 5 points for identifying the project and in next page, there are 10 points to discuss about the application for building.

Project Identification	
1	Company & Contact name (ProSoft Technology, Distributor or Partner)
2	Project name (in order to identify it)
3	Industry or Vertical market
4	Short description (100-150 characters)
5	Remarks (specific needs description)

www.prosoft-automation.com support@prosoft-automation.com +33 (0)5 3438 8720

ProSoft® Wireless Project Form
Where Automation Connects

Application Information	
1	Country of installation
2	Location of the application (where the network will be installed inside building or outside) <div> <input type="checkbox"/> Inside building <input type="checkbox"/> Outside building </div>
3	Number of radio <div> <input type="checkbox"/> Point-to-point (2 radio(s)) <input type="checkbox"/> Point-to-multipoint (... radio(s)) </div>
4	Mobility: radio are installed on moving or fixed devices <div> <input type="checkbox"/> Moving devices <input type="checkbox"/> Fixed devices </div>
5	Devices and equipments connected to the wireless network : <div> <input type="checkbox"/> Controller(s) <input type="checkbox"/> Sensor(s)/Actuator(s) <input type="checkbox"/> HMI terminal(s) <input type="checkbox"/> Computer(s) <input type="checkbox"/> ... </div>
6	Type of link(s) (GSM, Ethernet, ...) <div> <input type="checkbox"/> GSM <input type="checkbox"/> Ethernet <input type="checkbox"/> Fixed devices Network </div>
7	Protocols <div> <input type="checkbox"/> Process data <input type="checkbox"/> Messaging (configuration files, diagnosis information, ...) <input type="checkbox"/> Video <input type="checkbox"/> ... </div>
8	Data exchange details between the equipment communicating wirelessly and local cable (baud, parity, bits/s, ...)
9	Longest distance between antennas
10	RF cable length(s) between radio and antennas <div> <input type="checkbox"/> Mobile (vehicles, truck or trailer, ...) <input type="checkbox"/> Car(s)/Truck(s) <input type="checkbox"/> Controller(s) <input type="checkbox"/> Fixed (building, ...) <input type="checkbox"/> Building(s) <input type="checkbox"/> Tree(s) <input type="checkbox"/> ... </div>

In order for us to better support you, please do provide drawing(s), photo(s), and any document that will help for description of the application and the environment.

Diagram	Parts List	Site Details	Link Details
Part #	Quantity	Description	
RLX-FHE-EU	2	2.4 GHz Frequency Hopping Wireless Ethernet Switch	
LP-24002	6	N jack --> N jack BH lightning protection w/hardw	
A2408NJ-DP	4	8 dBi Directional patch panel N jack, 2.4GHz	
C19M10-40-002	6	2ft LMR 195 RA RP-SMA --> N plug cable	
C40M40-40-080	6	80ft LMR 400 N Plug --> N plug cable	
RLX-IHW-E	4	2.4 GHz/5.8 GHz High Speed Wireless Ethernet "Industrial Hotspot"	
A2415NJ-OC	2	15 dBi omnidirectional N jack collinear, 2.4GHz	
RLX-WPK001	1	RF Connector Weatherproofing Kit	

What's next? Site study

❖ Site study:

- ◆ Can be done by non radio expert.
- ◆ To identify antennas position, numbers of repeaters, feasibility, power requirements...
- ◆ Guide for the design of the network, bill of materials, report...

TIP:

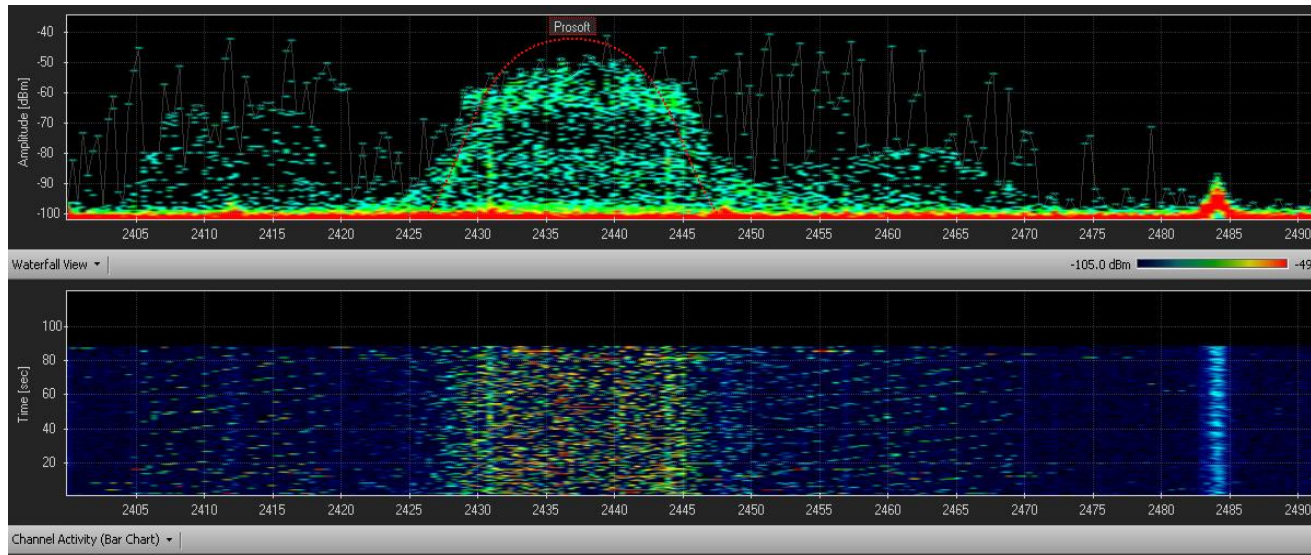

- Clear Line of sight – KEY POINT
- inSSIDer from MetaGeek
- Radio Browser – available parents
- Take pictures of the positions
- Record the information
- Write the report

What next? Site Survey

❖ Site survey:

- ◆ Requires a radio expert with the specific measuring systems
- ◆ Analyse frequency bandwidth, signals, networks...

❖ On site assistance during your project commissioning
